Your reference: Letter dated 29 April 2009

05 May 2009

Dear Sir,

Notice of re-validation for user programmable temperature data logger devices

We refer to your following user programmable temperature data logger device: *LogTag TRIX-8*. This device is currently listed in the PQS database as items E06/06.

We would like to thank you for having submitted the complete dossier for revalidation of this device under 2009 review.

We are pleased to inform you that this product was re-validated until 2010 annual review. Accordingly, your device will be published under the "*Revalidated devices*" section on the same WHO web page:

(http://www.who.int/immunization_standards/vaccine_quality/pqs_prequalified_devices_e06/en/index.html)

We will notify you formally of the date of next year's review.

Please, allow us to remind you that although PQS does not explicitly call for active monitoring, we do require notification of adverse events and device failures in accordance with our agreement under the terms and conditions of the PQS prequalification scheme.

Please, note that we will inform all UN partners of the prequalification status of your products in a separate letter.

Yours sincerely,

Mr Denis Maire
Technical Officer
PQS Secretariat
