

IP66

MGD - datasheet

Dimensions and Weight:

152 x 162 x 75 mm - 830 g
6 x 6.4 x 3 inches - 1.83 lbs

Applications ▶

The IP66 version is recommended for applications where high levels of dust, moisture or condensation is present. It is not available for IR CO2 sensors.

The sensor is fitted into a Delrin head with sintered steel disc which projects outside an IP66 enclosure.

This ensures fast sensor response and prevents condensation reaching the electronics.

It is rated $-40\text{ }^{\circ}\text{C}$ to $+50\text{ }^{\circ}\text{C}$.
($+40\text{ }^{\circ}\text{C}$ with electrochemical sensors)
