

Decorative Face Plate (for remote sensor)

MGS - datasheet

Dimensions and Weight:

Standard

86 x 86 mm – 86 g

3.4 x 3.4 inches – 0.19 lbs

Applications ►

In certain installations where aesthetics are important, we offer an alternative arrangement.

You can fit the sensor head remotely in a back box 44mm deep behind an elegant stainless-steel face plate (brass option shown) while the rest of the sensor is located elsewhere.

Alternatively, a metal face plate can be painted to suit your decor.

Because Murco designs and manufactures all its detection systems, it is able to tailor solutions to meet the requirements of any client.
